

Protect Your Pets with a Rabies Shot

Rabies shot clinics are held at various locations throughout Onondaga County and are free for Onondaga County residents. A voluntary donation per family is appreciated. Please be sure to keep your pet on a leash or in a carrier during the rabies clinic and bring past shot records with you. Protect your puppies and kittens at three months of age. Give them a booster shot at one year old and then every three years. Ferrets should get a vaccine every year. Upcoming clinics are listed below and at www.ongov.net/Health/Clinics.
